Experienced React js developer skilled in creating dynamic and responsive user interfaces, integrating RESTful APIs, and collaborating with cross-functional teams for delivering high-quality software solutions. Proficient in backend development with Node.js, MongoDB and MySQL, ensuring end-to-end development process.

EXPERIENCE :

**Arodek Technology Consulting Private
Limited as a Full Stack Developer**

10-10-2022 - present

PROJECTS :

- **Freelly Admin Portal :-** Developed an **admin portal for the Freelly Carpool App** using **React.js**, enabling comprehensive management of app functionalities, including user accounts, settings, payment history, and customer support. The portal provides an intuitive interface for efficient administration and seamless control of all key app operations.
- **Skipper Training Need Identification Portal :-** Developed a hierarchy-based **Training Need Identification (TNI) portal** using **React.js**, streamlining training management and communication within the organization. The portal includes features for super admins to create and manage user accounts, assign training sessions, and upload training data via Excel. Designed an intuitive interface for employees to log in, view scheduled training sessions (with date, time, and venue details), access a calendar view, and receive automated email notifications. Implemented functionality for employees to submit post-training feedback and for managers to provide performance evaluations. Delivered a seamless, user-friendly experience to enhance training workflows and engagement.
- **Self-development checklist portal :-** Developed the **backend for a self-development checklist portal** using **Node.js** and **MySQL**. The portal enables users to sign up, verify their email, and log in. After login, users can select a self-development checklist and answer related questions. Upon completion, they receive an email with their total score and are redirected to a dashboard. The dashboard displays all checklists, reports, and graphical insights, allowing users to track progress and revisit the portal to assess their growth over time.

- **Rashmi automation invoice portal :-** Developed an **admin portal for Rashmi Group** using **React.js**, enabling seamless storage of automated, extracted invoices from the database via **REST APIs**. The portal allows admins to review, verify, and process invoices, including parking MIRO entries and transferring data to the **SAP database** using **SAP BAPI**. Additionally, designed and implemented all required APIs for the portal using **Node.js** and **MongoDB**, ensuring efficient data management and integration.
- **IFB Document upload portal :-** Designed a **document upload portal for IFB** using **React.js**, enabling vendors to upload invoices for scanning. The portal also manages essential activities, including maintaining the vendor list, upload reports, and scanning reports, ensuring streamlined document processing and efficient record-keeping.
- **IFB MIS Portal :-** Developed an **admin dashboard website** using **React.js** to manage and generate weekly and monthly MIS reports. The dashboard integrates with a database via **REST APIs**, ensuring efficient data storage, retrieval, and report generation for streamlined management.

EDUCATION

College of engineering and management, Kolaghat

July-2018 - July 2022

- Completed B.Tech in Information Technology - 8.5 CGPA

SKILL

- Javascript, React Js, Angular Js, Node Js, Express js
- HTML5, CSS3
- MongoDB, MySql, RESTful API
- Bootstrap, Tailwind Css
- Git, GitHub

LANGUAGES

English
Bengali
Hindi
